

The new CEO of Unilabs Slovakia starts in September 2022

BRATISLAVA 1.9.2022: Stanislav Čársky becomes the new general director of Unilabs Slovakia from September 1st and replaces Peter Lednický in this position. This is the completion of the succession process for the position of national CEO, which was being prepared since the beginning of the year. During September, the new director Stanislav Čársky will take over all the agenda and get to meet and know his team.

"It is an honour for me to take over a well-established company with a 25-year tradition and belonging to one of the largest European diagnostic groups. I believe that together we will be able to fulfil the visions with which I am coming to Unilabs and defend the position of the unit on the Slovak diagnostic market", said the new CEO Stanislav Čársky.

"I am very happy that after fifteen years in the position of CEO, I can hand the imaginary sceptre into the hands of Stanislav Čársky, with the confidence that Unilabs Slovakia will continue its mission and philosophy. I want to thank the people who wrote the story of Alpha medical and later Unilabs Slovakia with me. A story that started with one small analyser and ended with the performance of more than a hundred thousand examinations per day and a turnover of more than 100 million euros. I believe that it will continue successfully in the future," responds the outgoing director Peter Lednický, who will remain with the company until the end of September.

"Let me thank Peter for his always professional and entrepreneurial management of the company and for his cooperation from our acquisition to one of our top unilabs companies.

At the same time, I would like to welcome the new CEO Stanislav Čársky to the Unilabs family and I am very happy that he has accepted our offer to become the general manager of Slovakia. I wish him a lot of success and is together with the rest of our Slovakian teams, looking forward to work with him," said Lars Jørgensen, Group Regional Director.

Stanislav Čársky takes up the position of CEO with experience in the healthcare business, where he has worked since 2001 in various local and international positions with important market players. He comes to Unilabs Slovakia from the position of local director of Ferring Pharmaceuticals.

Twenty-five years ago, Peter Lednický was at the birth of Alpha medical, which gradually under his leadership became the largest laboratory network in Central and Eastern Europe and in 2017 became part of the international Unilabs network based in Switzerland. He is leaving the company after experiencing the highest growth in its history. He will continue to work in the healthcare sector.
